JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Reports from Hankow for the periods ended October 2 and 9, respectively, show cases of cholera in the vicinity and 1 case of plague on a river steamer, and that dysentery is still prevalent.

Week ended October 16. Supplemental bills of health issued to 5 steamships, the aggregate personnel of which amounted to 1,200. There were inspected 4 vessels, 497 members of crews, and 4 cabin and 181 steerage passengers. Manifests were viséed for 17,168 pieces of freight. There were bathed 100 steerage passengers, and their effects, numbering 136 pieces, were disinfected by steam. There were examined 77 steerage passengers for San Francisco per steamship *China*, of whom 21 were recommended for rejection, 20 rejections being for trachoma. There were also examined 42 emigrants for Manila per steamship *Minnesota*, of whom 38 were passed and 4 recommended for rejection.

There was one case of beriberi on board the German steamship *Albenga*, and one similar case had been left in hospital at Kobe.

The general health conditions of this port remain practically unchanged.
